Quick Guide

N1071/N1072 IP Box Camera

Connection diagram

Step 1 Connect the video server to the switch hub and analog camera

Connect lens as shown

Remove the cover of sensor and connect the lens by screwing it into the camera clockwise.

* Lock the lens after lens connected by keeping screwing. It will be idle running if the lens is locked.

NOTE:

Use the hexagonal wrench to release the lens ring and adjust the lens, if there is any unfitted condition occurred after the lens is connected.

Connect to the power outlet

Connect to a power outlet using the supplied power cable after connecting the lens.

The Power Led Indicator will light in red when the power on.

* The product can operate on DC 12V or PoE based on the model you buy. - Page 1 -

3 Connect the switch hub to your PC

Use a network cable and plug it in the LAN port of the product. Plug the other end of the cable in the LAN port of the hub.

4 Connect to microphone in

Connect the microphone with 3.5mm phone jack into the "MIC IN".

Connect to speaker

Connect the speaker to the "AUDIO OUT".

Connect all the external I/O setting

* For further details, please refer to user manual in the attached CD.

Turn on the power.

Turn on the power of the PC and hub.

Step2 Camera settings

Start

Execute the Cam Finder.exe file from the supplied CD.

2 Find the camera (Search)

Search for the product from your LAN. The default IP setting **192.168.0.20** appears on the screen.

Click Search to find the IP CAM on the LAN.

Changing the IP address and related settings for the network environment

When you find the camera, click it and the settings appear on the right side. You can change the settings for the new network environment as you need.

 You have to enter a new settings in the IP Netmask and Gateway fields and keep the settings in other fields unchanged.

Submit data (Submit)

Submit -					Exit
☐ DHCP					
IP	192	168	20	226	
Netnask	255	255	255	0	
Gateway	192	168	20	254	
HTTP Port		8	0		

• Click Submit to apply the new settings.

Steps

3 Select "medium" for security

Make sure that Level II, the commonly used default security level, is set for the security.

Check that the security level is Level II.

Note: This product supports IE 6.0 or above.

OK

Click ${\it OK}$ to quit.

manual

Attention

- 1. Please refer to user manual for more detailed explanation of the hardware installation.
- 2. Where no switch hub is available, you can search and .set up the camera using the network peering approach. However, you may need a jumper and need to change the LAN configuration on your PC for this purpose. It is recommended to request a qualified engineer for the connection or execute the network peering referring to the user's
